WORK EXPERIENCE

AI Engineer Retainer— Tata Electronics Pvt. Ltd.

Nov 2025 –present

- Supported **production planning** and **operational decision-making** through **data-driven analysis**, improving forecast and planning accuracy by **12–18%**.
- Performed planned vs. actual analysis** and **tracked operational KPIs (utilization, throughput, cycle time)** to support management reviews and corrective actions.
- Developed and maintained Excel-based operational and **safety dashboards**, translating complex system outputs into actionable insights and monitoring **risk, compliance, and governance metrics (NVIDIA Omniverse)**.
- Partnered cross-functionally with **operations, planning, and engineering teams** to validate data, document assumptions, and ensure data accuracy, consistency, and repeatable reporting.

R&D Intern — NIT Warangal

Nov 2023 – Dec 2023

- Developed LLM evaluation pipelines using Python, FastAPI, and AWS Lambda, orchestrating distributed inference jobs across GPU clusters and processing 5K+ evaluations daily.
- Benchmarked multiple Large Language Models (Claude Sonnet 3.5, GPT-4, Amazon Nova) for reasoning accuracy and response alignment, achieving 25% improvement in contextual accuracy through systematic prompt engineering.
- Implemented parallel task orchestration with async processing and batch payload optimization, reducing evaluation latency by 80% while maintaining robust error handling and retry mechanisms in distributed systems.
- Collaborated with cross-functional research teams in an Agile environment to iterate on prompt orchestration logic and data tokenization strategies, contributed to technical documentation, and achieved a 40% improvement in experimental throughput.

EDUCATION

National Institute of Technology (NIT), Warangal,

Dec 2021 – Apr 2025

B.Tech in Mechanical Engineering

TECHNICAL SKILLS

Languages : Python, Java, JavaScript, TypeScript, C++, SQL

Frameworks & Cloud: React.js, Node.js, Express.js, FastAPI, LangChain, AWS (Lambda, S3, ECS, CloudWatch, OpenSearch, DynamoDB), Docker, Git

AI & Systems: LLM Orchestration (Claude, GPT-4, Amazon Nova), RAG Pipelines, AI Agent Frameworks, Microservices Architecture, Distributed Systems

Software Engineering: Data Structures & Algorithms, Agile/SDLC, CI/CD, Object-Oriented Design

PROJECTS

CortexFlow: AI Workflow Orchestration Platform | *LangChain, FastAPI, AWS Lambda, React.js, OpenAI GPT-4, DynamoDB*

- Designed and deployed a distributed AI agent system using LangChain and FastAPI, automating scheduling, email triage, and note summarization, reducing manual task overhead by 55%.
- Built serverless microservices with AWS Lambda and DynamoDB, implementing scalable APIs, centralized logging, and low-latency request handling with sub-second response times.
- Developed a React.js dashboard for real-time workflow orchestration, monitoring, and prompt optimization, improving system observability and operational reliability.

Campus Market - Intelligent Marketplace Platform | *React.js, Node.js, Express, MongoDB, AWS S3, LangChain, OpenAI GPT-4, RAG, MCP Protocol*

- Architected and deployed a full-stack marketplace platform using React.js, Node.js, Express, and MongoDB, implementing secure authentication, real-time listings, and AWS S3-based media storage, supporting 500+ active users with 99.8% uptime.
- Designed scalable backend APIs and microservices, ensuring high availability, efficient data access, and reliable system performance under concurrent user load.
- Implemented LLM-powered semantic search and conversational AI using LangChain, OpenAI embeddings, RAG, and MCP servers, improving search precision by 50% and increasing user engagement by 45%.

Leadership & Organizational Experience

- General Secretary — NSS, NIT Warangal (2023)** – Directed 6+ large-scale community initiatives, including a Blood Donation Camp (350+ units) and Unity Run (500 participants). Spearheaded awareness drives, women's self-defense workshops, and technical talks, engaging 1,200+ students and improving volunteer participation by 35%.
- Head of Logistics — SpringSpree, NIT Warangal (2023)** – Managed logistics operations for South India's 2nd-largest cultural fest (5,000+ attendees), coordinating 100+ volunteers and 20+ vendors. Perfected scheduling and resource allocation, cutting setup time by 2 hours/day and ensuring seamless event execution.
