WORK EXPERIENCE

AI Engineer — Tata Electronics Pvt. Ltd.

Nov 2025 – present

- Developed digital twins of semiconductor fabrication, assembly, and testing facilities using NVIDIA Omniverse, enabling interactive visualization of manufacturing operations and plant layouts.
- Automated digital twin development by creating Python scripts and custom Omniverse extensions for asset grouping, reducing manual effort and accelerating model creation.
- Partnered with Quality teams to gather business requirements, define operational KPIs, and build interactive analytics dashboards using Plotly Dash for Quality data.
- Designed intuitive dashboard interfaces and translated business requirements into visualizations that enabled engineers and managers to monitor quality performance through actionable KPIs.
- Analyzed manufacturing quality datasets to identify trends, validate KPIs, and integrate dashboards with live production data for real-time monitoring.
- Collaborated with manufacturing stakeholders to define operational metrics including Throughput, Work in Progress (WIP), OEE, and OLE for Operational Twin dashboards.
- Designed and implemented Operational Twin dashboards in NVIDIA Omniverse by combining plant layouts with interactive operational analytics and production insights.
- Built real-time data integration pipelines by connecting dashboard applications with SQL databases, enabling live visualization of manufacturing KPIs.
- Worked closely with cross-functional teams to iteratively improve dashboard functionality through stakeholder feedback and changing business requirements.

Business Analytics Intern — Outlook Publishing Group

May 2024 – July 2024

- Analyzed sales and customer datasets using Python and SQL, performing exploratory data analysis (EDA) and developing KPI reports to support business decisions.
- Automated data cleaning, reporting, and analytical workflows, improving reporting efficiency and reducing manual effort through Python-based automation.
- Built interactive dashboards and visualizations in Power BI/Tableau to communicate business insights and performance trends to stakeholders.

EDUCATION

National Institute of Technology (NIT), Warangal,
B.Tech in Mechanical Engineering

Dec 2021 – Apr 2025

TECHNICAL SKILLS

Data Analysis & BI: SQL(Advanced Joins, Window Functions, Query Optimization), Power BI, Tableau, Excel

Programming: Python (Pandas, NumPy), Java

Data Handling: ETL Workflows, Data Validation, Data Modeling, KPI Reporting

Databases: PostgreSQL, MS SQL Server

Business Analysis: Requirements Gathering, Stakeholder Management, Process Improvement, Root Cause Analysis

PROJECTS

Real-Time Steel Damage Classification with AWS Cloud Technology | AWS Rekognition, Lambda, S3

- Designed and deployed a **serverless computer vision pipeline** on AWS to perform **real-time defect classification**, processing **5,000+ images/day** for industrial quality control.
- Optimized and evaluated **image classification models**, improving accuracy from **82% to 93%** while reducing false negatives in safety-critical inspection workflows.
- Automated **inference and post-processing pipelines** using **parallel execution** and **cloud-native orchestration**, reducing end-to-end analysis time from **2 hours to 30 minutes** and enabling scalable deployment across multiple production units.

Domino's Branch Sales Analytics and Visualization | MS SQL Server, Power BI

- Built a **sales analytics platform** in MS SQL Server to manage and query **50,000+ transaction records**, improving reporting speed by **35%**.
- Designed a **Power BI dashboard** with advanced **data modeling** and **DAX**, providing real-time insights into **10+ KPIs** such as sales performance, customer retention, and product mix.
- Conducted **trend analysis and demand forecasting**, boosting forecast accuracy by **20%** and enabling data-driven operational planning during peak hours.

Leadership & Organizational Experience

- **General Secretary — NSS, NIT Warangal (2023)** – Directed 6+ large-scale community initiatives, including a Blood Donation Camp (350+ units) and Unity Run (500 participants). Spearheaded awareness drives, women's self-defense workshops, and technical talks, engaging 1,200+ students and improving volunteer participation by 35%.
- **Head of Logistics — SpringSpree, NIT Warangal (2023)** – Managed logistics operations for South India's 2nd-largest cultural fest (5,000+ attendees), coordinating 100+ volunteers and 20+ vendors. Perfected scheduling and resource allocation, cutting setup time by 2 hours/day and ensuring seamless event execution.
