WORK EXPERIENCE

AI Data Engineer Retainer — Tata Electronics Pvt. Ltd.

Nov 2025 – present

- Developed and maintained ETL pipelines using Azure Data Factory (ADF) to ingest data from enterprise systems, SQL databases, and flat files into centralized storage.
- Built scalable storage layers in Azure Data Lake Storage Gen2 (ADLS) implementing Medallion Architecture (Bronze/Silver/Gold) for structured data processing.
- Performed data transformation and large-scale processing using Azure Databricks (PySpark) to cleanse, standardize, and prepare datasets for analytics.
- Modeled analytical datasets in Azure Synapse Analytics using T-SQL and dimensional modeling to support reporting and business intelligence workloads.
- Implemented incremental data loads, validation checks, and schema enforcement to ensure data quality and pipeline reliability.
- Orchestrated automated workflows with ADF triggers, parameterized pipelines, and monitoring, reducing manual data preparation effort.
- Optimized query performance and data retrieval through indexing, partitioning, and SQL tuning, enabling faster access to operational insights.

Business Analytics Intern — Outlook Publishing Group

May 2024 – July 2024

- Analyzed and modeled 20,000+ records using Python and SQL to forecast sales trends, improving prediction accuracy by 18% and supporting data-driven decision-making.
- Performed exploratory data analysis and KPI modeling to identify demand and engagement drivers, improving campaign efficiency by 15% and customer retention by 12%.
- Designed and automated ETL pipelines and analytical workflows, reducing manual processing by 40% and cutting reporting turnaround time from 2 hours to 30 minutes.

R&D Intern — NIT Warangal

Nov 2023 – Dec 2023

- Designed and optimized image processing pipelines using Local Binary Patterns (LBP), OpenCV, and NumPy, achieving a 17% runtime improvement through algorithmic and computational optimizations.
- Prototyped and evaluated CNN-based deep learning models using TensorFlow, PyTorch, and Keras, applying transfer learning to improve image classification performance.
- Curated benchmark datasets (Corel-250) and automated model evaluation workflows using k-NN and SVM ranking models, reducing experiment evaluation time from 2 hours to 30 minutes and improving reproducibility.

EDUCATION

National Institute of Technology (NIT), Warangal,

Dec 2021 – Apr 2025

B.Tech in Mechanical Engineering

TECHNICAL SKILLS

Data Engineering & ETL: Azure Data Factory (ADF), ETL/ELT Pipelines, Data Ingestion, Data Transformation, Data Validation, Workflow Automation

Programming: Python (Pandas, NumPy), SQL, Java

Cloud & Storage: Azure Data Lake Storage Gen2 (ADLS), Cloud Data Pipelines, Medallion Architecture

Big Data & Processing: PySpark, Distributed Data Processing, Batch Processing

Databases & Warehousing: MS SQL Server, PostgreSQL, Relational Databases, Dimensional Modeling, Data Warehousing

Visualization & Consumption: Power BI (Data Models, DAX), Tableau

Concepts: Data Modeling, Schema Design, Incremental Loading, Query Optimization, Performance Tuning

PROJECTS

Industrial Data Processing Pipeline (Manufacturing Inspection Data) | AWS Rekognition, Lambda, S3, Python, SQL

- Developed a cloud-based pipeline to ingest and process industrial inspection data used for quality monitoring.
- Automated transformation of raw files into structured datasets for downstream analytics workflows.
- Implemented scalable storage and batch-processing using S3 and Lambda to handle high-volume daily data.
- Added validation and logging mechanisms to ensure data reliability across processing stages.

Retail Data Warehouse & ETL Pipeline (Domino's Sales Data) | MS SQL Server, Power BI

- Built a data warehouse solution to process and analyze multi-branch Domino's sales transactions (50K+ records).
- Designed relational schemas and implemented ETL workflows to load raw transactional data into structured reporting tables.
- Optimized SQL queries, indexing, and joins to improve performance by 35%.
- Created curated datasets consumed by Power BI for KPI tracking and demand analysis.

Leadership & Organizational Experience

- **General Secretary — NSS, NIT Warangal (2023)** – Directed 6+ large-scale community initiatives, including a Blood Donation Camp (350+ units) and Unity Run (500 participants). Spearheaded awareness drives, women's self-defense workshops, and technical talks, engaging 1,200+ students and improving volunteer participation by 35%.
- **Head of Logistics — SpringSpree, NIT Warangal (2023)** – Managed logistics operations for South India's 2nd-largest cultural fest (5,000+ attendees), coordinating 100+ volunteers and 20+ vendors. Perfected scheduling and resource allocation, cutting setup time by 2 hours/day and ensuring seamless event execution.
